Getting started

1. Introduction

Congratulations on having purchased Arsenal, an additional device. Your time in laser tag is our TOP priority. We attempt to keep the game easy, fun, and modern.

The device is functional right out of the box.

If you are just getting to know laser tag equipment, the instructions will help you learn quickly and start the game. If you're a seasoned user, go through all of the information and make sure you didn't miss anything from the possibilities provided by Arsenal, an ammo replenishing device.

2. Description

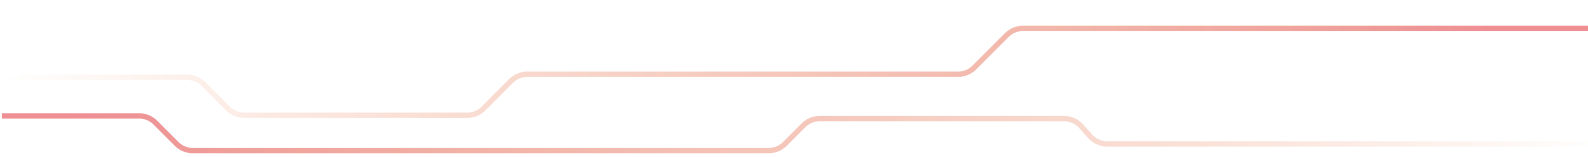

Arsenal replenishes the players' ammunition supply. On the device front there is a large yellow button for operation and two infra-red diodes. On the top and bottom sides, respectively, are a charging connector and anti-vandal lock. The four holes on the rear panel allow the game set to be mounted on a wall or other surface.

Arsenal is indispensable for sports laser tag tournaments, tactical training, corporate and entertainment arena events.

Playing with Arsenal

3. Switching on/off

The game set is activated with a special key. The vandal-proof lock is located on the top panel. After switching on, the yellow button lights up, signaling that it is ready for operation.

4. Device settings

Arsenal does not provide for any additional adjustments. All the player has to do is press the button when the ammunition supply runs out.

5. Operation

Switch the device on, set it on the playground, press the button when you run out of ammunition. One button press - one pulse. Game sets that come within range of the device receive a new ammunition supply. After replenishing, the battle can be continued.
