Getting started

1. Introduction

Congratulations on having purchased a laser tag knife, an additional device. Your time in laser tag is our TOP priority. We attempt to keep the game easy, fun, and modern.

The device is the pinnacle of additional LASERWAR devices. You can take the device out of the box and start working right away thanks to the user-friendly interface and control system.

If you are just getting to know equipment, the instructions will help you learn quickly and start the game. If you're a seasoned user, go through all of the information and make sure you didn't miss anything from the possibilities provided by the laser tag knife.

2. Description

The laser tag knife is a plastic training knife prototype. On the playground, the device imitates a close combat.

The button on the handle, IR diode for the target; charge indication diode (green - charged, red - charging connected), IR receiver in the recess, magnetic charging connector on the back of the handle - provide controls and an interaction with the player.

Playing with a laser tag knife

3. Switching on/off

By default, the knife is in standby mode; however, pressing the button for a sec. causes it to activate for a sec., make a shot, and then return to the standby mode.

4. Device settings

There are no extra modifications needed with the laser tag knife. The learning mode is its key feature. The Knife is equipped with an IR receiver and remembers the player's ID. Knife-related kills will be recorded in the statistics.

To put the knife into the teaching mode, press the button for 15 sec., then shoot the tagger at the IR receiver, which is located at the base of the blade. The color of the player will be remembered by the device.

If no setting is made, the default ID of the knife: 127. The knife goes into the standby mode after saving the settings.

5. Operation

The single button controls everything. To shoot, turn the knife with the handle towards the opponent's hit sensors (IR diodes are located in the handle), press the button.
