Getting started

1. Introduction

Congratulations on having purchased IGB, an additional device. Your time in laser tag is our TOP priority. We attempt to keep the game easy, fun, and modern.

The device is functional right out of the box. If you are just getting to know laser tag equipment, the instructions will help you learn quickly and start the game. If you're a seasoned user, go through all of the information and make sure you didn't miss anything from the possibilities provided by IGB.

2. Description

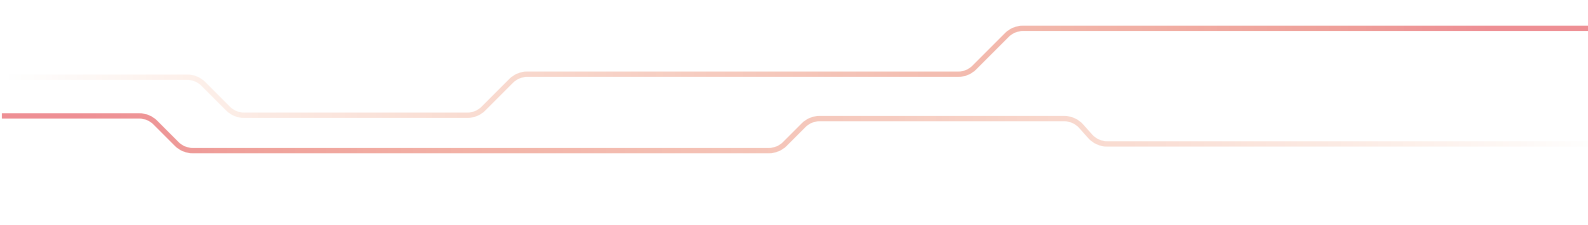

Interactive Game Base is a small black suitcase with a carrying handle. Inside there is a power LED, an audible alarm, two information displays, a numeric keypad and an anti-vandal lock. The charging socket is located on the outer side.

After entering the code, the device is activated; you must also enter the code to deactivate it. If this does not occur, IGB will explode when the time limit has expired, injuring all nearby players. A loud sound indicates an explosion.

Playing with IGB

3. Switching on/off

IGB is switched on/off by turning the key, which is held by the instructor for the game duration. The round time will appear on the OLED display after the device has been turned on. When deactivated/exploded, the device can be used again only after it is turned off.

4. Device settings

IGB is manually configured without the use of any third-party software. Two passwords are provided by default: one for the administrator (all ones), and one for the player (all twos). To enter the Settings mode, you'll need the administrator password. If you have forgotten the password, hold down the number 5 button when switching on (turning the key). The passwords will be restored to default. The key * stores parameters, while the key # cancels them.

Once ones have been entered, the settings menu will open:

- 1 - Admin - change the administrator password here.
- 2 - Deact - change the player's password here.
- 3 - Time - the time from activation until the device explodes, the value varies from 1 sec. to 99 min. 59 sec.
- 4 - Logo - you can enter the name of your club or team here, and it will appear on the screen when the game set is turned on. With keys 2 and 8, select a letter, then move to the desired location with keys 4 and 6.

5. Operation

When activating and deactivating the device, the player's password is required; the default is all twos. A countdown begins when IGB is turned on, during which the password must be picked and entered. Once the correct password has been entered, the device is deactivated and the corresponding message appears on the display.

At the end of the game, the winner is the team that has either detonated IGB or prevented that.
