

CYBERTAG BLACK EDITION equipment bundles commercial offer

If you enjoy recreational activities and would like to turn them into a source of income – welcome to our company!

We would like to offer you to become our strategic Partner.

**CYBERTAG is a new development by LASERWAR –
a world leading company that produces equipment for laser tag.**

CYBERTAG is a variety of indoor laser tag and a next generation game. Players receive a blaster and a vest. The blasters are needed to hit rivals. Hits are registered by sensors that are fitted on players' vests. The game is entirely pain free. Therefore, even the youngest players can participate.

Indoor laser tag is mainly aimed at kids and families. Nevertheless, a lot of young people play it and there are numerous corporate parties. It stands for passion for games and the unforgettable experiences brought about by a brilliantly designed arena. Designed in Star Wars style, or the style of other planets, jungles, as well as the futuristic weapons – they attract those who are eager to forget about dull reality for a while and dip into the fantastic world of the game. This game variety is more of an attraction, a show rather than sports.

**Advantages of CYBERTAG
over other game varieties:**

- Players safety is above all!
All our equipment meets the required safety standards;
- Striking and ergonomic equipment design;
- Modern software (online statistics, wide possibilities for configuration and own scenarios creation);
- Instructions and technical support (our specialists are highly qualified and are always there to help you).

The striking design of weapons and vests, the outstanding quality of sound effects, of vibro and RGB light indication, the additional arena equipment making the game more diverse, the statistics displayed in real time on TV panels will leave players exceptional unforgettable experiences and will make them come over again and again and become your regular customers.

The number of laser tag arenas keeps rising rapidly!

Optima – basic set for start-up businesses with low budgets. It will be sufficient for an arena with an area of up to 300 sq.m.

Smart – the most popular set for start-up businesses. Can be used for arenas with an area of up to 400 sq.m.

Pro – includes an extensive set of equipment and additional devices. Designed for arenas with an area of 400 sq.m or above. Allows to hold any scenario games.

Any set can be altered to suit your preferences.

The most popular sets have so far been OPTIMA, SMART and PRO. Together with the equipment, you will receive a DVD with sales and technical information as well as a repair set.

The equipment comes with a 1-year warranty.

All software updates are provided free of charge throughout the duration of CYBERTAG equipment use.

Vest The vest has three defeat zones (left- and right-hand side of the vest, back), powerful vibration and a changeable cuff. The vest only weighs only 980 grams.

Blaster Created specially for indoor laser tag. The blaster weighs only 580 grams. It has the defeat zone and a unique LED light effect of the shots.

IGB INTERACTIVE GAME BASE (IGB) – an universal device, which regulates a player’s moves. Can perform several functions: Base, Energizer, Target, Land Mine, Turret.

Energizer Energizer is a universal device used to restore player’s health, to replenish the ammunition of the set.

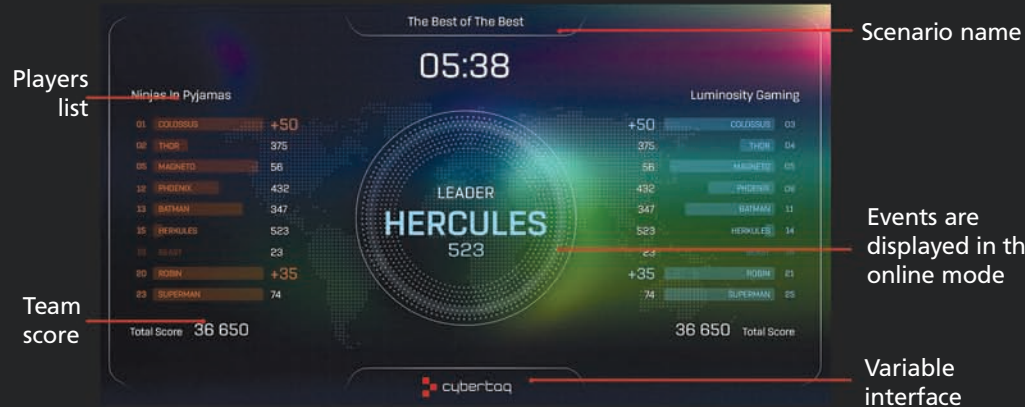

Radio base

The device is used for reading statistics online and for game management.

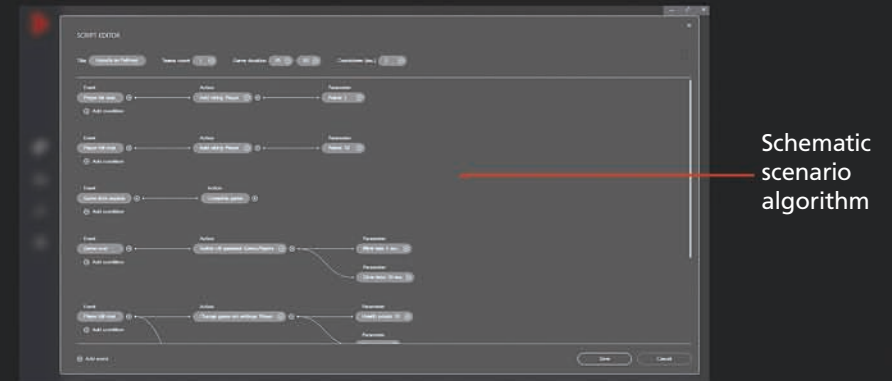

Software

CYBERTAG computer software enables flexible online control of the game, makes it possible to change equipment setting, edit the scenario, read and print out the statistics.

Software

Participants and spectators can watch the game, view the personal statistics and team score on big TV screens.

Software

The scenario can be chosen from the list of ready scenarios, or one can create their own scenario.
